

Parents' Day

Parents' Day is a celebration honoring the parents: mothers, fathers, and other family members, such as grandparents and their influence in society.

Each class group has two "performance" kind of parties each school year. One of them at the end of the first half of the school year in December and one at the end of the second half in May. As the mothers' and fathers' day is celebrated on different days in many parts of the world, we took the initiative and merged the two celebration into one day: Parents' Day.

Each class has a separate Parents' Day party, where the children perform various songs, learned previously the year and a variety of rhymes and poems depending on the age group. The 'older ones' usually perform a whole story or a play. After the performance, the children give gifts to their parents, which they very carefully made before with lots of love.

All children make two separate individual presents for their mums and dads, with two different art techniques to show their appreciation and love. These beautiful gifts proudly represent how their skills have improved since the beginning of the year.
